HOW TO USE THE FORMULARY (Press Ctrl and F then type in the drug name or condition)

The medications on the Advanced Health formulary are grouped into categories depending on the type of medical conditions they are used to treat. Medications are listed in alphabetical order by Therapeutic Indicators.

Every effort has been made to accurately list Prior Authorization requirements, Quantity Limits, Age Limits and Specialty Pharmacy requirements. However, some drugs - due to supply issues, cost, or other factors, may require a prior authorization, or have quantity limitations not listed.

Any Prescription Over \$500 Will Require a Prior Authorization

GENERIC AND BRAND NAME MEDICATIONS

Advanced Health is a mandatory generic health plan. Generics must be used when commercially available. The presence of a brand name medication next to the generic equivalent is for informational purposes only, and is NOT an indication of coverage. Coverage of multisource brand drugs listed on the AH formulary that have generic equivalents available may require prior approval, as generic is preferred over brand name.
